

Dear Customers,

My A/C was not working and I called four A/C service companies. All but AFFORDABLE Services told me that I needed a new A/C central unit which would cost \$3000 or more. AFFORDABLE came and told me that we needed a new fuse and not a new unit. So I replaced that fuse, checked out the system, made a few recommendations to keep it working well, and the system continues to work well. The cost for the service call was \$120.

Thank You
ED TOMBACK
